4 x 0.6m
BLACK CHAINS
AND HOOKS

INVERTED RACK MAX LOAD 25KG

2 PAIRS 0.6m
BLACK CORDS

TIMBER

Quality Redwood laths are used on all our products. With the exception of the Utility Airers, the laths have been sealed with a polymer resin giving a wipe clean surface. This prevents grease, moisture, dye and detergent ingress which could harm the timber and stain clothing.

CORD

Longlasting poly fibre cord is standard on all our airers. Jute or cotton cords are also available. Sufficient cord is supplied to suspend airers from a 2.7m/9ft ceiling. Longer cord can be supplied.
